ANALYSIS & TESTING

XRF ANALYSIS SERVICES

Glass Technology Services Ltd is an independent technical services organisation providing XRF (X-Ray Fluorescence) analysis to leading glass manufacturers worldwide.

The XRF service is designed with tight production schedules in mind with reports being typically issued within 2–5 days of sample receipt. A rapid service is also available with same/next day reporting. Our dedicated programmes designed specifically for glasses allow greater accuracy and lower limits of detection than many "one size fits all" general programmes operated by other labs.

This service is backed by an extensive range of analytical facilities including scanning electron microscopy (SEM) and wet chemical analysis. Services related to all areas of glass technology are provided by experienced, multi-disciplinary staff, and most are UKAS accredited.

CURRENT SERVICES AVAILABLE:

- Raw materials, refractories and oxides analysis
- Dedicated container glass/flat glass programmes
- Trace lead and cadmium content programme
- Dedicated lead crystal glass programme

THE BENEFITS:

- | | | |
|--|---|---|
| • Rapid turnaround | » | Same day / next day available |
| • Experience of the Glass Industry | » | Analysis tailored to the industry's needs |
